PROFESSIONAL SUMMARY

Senior UI/UX Designer with experience designing responsive websites, mobile applications, and digital products from early concepts through developer handoff. Creates user flows, wireframes, high-fidelity interfaces, and interactive prototypes in Figma. At Slidey LLC, designs websites for Webflow implementation and works with developers to translate responsive layouts, components, and interaction decisions into production-ready experiences.

PROFESSIONAL EXPERIENCE

Senior UI/UX Designer | Slidey LLC

Oct 2024 – Present

- Design responsive, user-centered websites and digital experiences for clients, covering page structure, user flows, wireframes, interface design, and interactive prototypes.
- Create website designs specifically for Webflow implementation, with reusable components, responsive behavior, clear states, and practical developer handoff.
- Collaborate with clients, project managers, and Webflow developers to clarify requirements, review feasibility, and carry designs through implementation.
- Apply visual hierarchy, accessibility awareness, and consistent design patterns to improve usability across desktop, tablet, and mobile breakpoints.

UI/UX Designer | HashOne Digital

Mar 2024 – Sep 2024

- Translated user and business requirements into site maps, user flows, wireframes, polished interfaces, and clickable prototypes for web and mobile projects.
- Designed interface elements and interaction states, including navigation, tabs, forms, menus, and reusable components.
- Used competitor reviews and market research to inform layout, feature, and interaction decisions while maintaining a clear product direction.
- Worked with project managers and engineers to refine requirements, address technical constraints, and support accurate implementation.

UI/UX Designer | Quantum Paradigm

Aug 2023 – Feb 2024

- Supported digital product work by creating wireframes, mockups, prototypes, and interface updates under the guidance of senior designers.
- Participated in usability-testing sessions, organized feedback, and revised designs to address recurring user issues.
- Reviewed competing products and current interface patterns to support evidence-informed design choices.
- Partnered with developers during handoff and implementation to preserve design intent and resolve feasibility concerns.

UI/UX Design Intern | Hyperlink Institute

Dec 2022 – Jan 2023

- Researched user needs and behavior to support early design decisions for practice and client-facing projects.
- Contributed to design reviews, incorporated feedback, and improved interface consistency and usability.

CORE SKILLS

UX & Product: User flows, wireframing, information architecture, interaction design, responsive web design, mobile app design, prototyping, usability testing, competitor analysis, developer handoff, design systems

Tools: Figma, Adobe XD, Adobe Photoshop, Adobe Illustrator, Webflow design collaboration

EDUCATION & TRAINING

UI/UX Design Program | Hyperlink Institute | 2022

Diploma of Associate Engineering, Automobile Technology | Memon Industrial & Technical Institute | 2021

Matriculation | Ali Educational Academy | 2019

Languages: Urdu (native), English (conversational)
